

The Company:

Mearthane Products Corporation (MPC) is a privately-owned global technology leader in the development and manufacture of advanced polyurethane and precision metal components, headquartered in Cranston, RI, with additional facilities in Bristol, RI, E. Cranston, RI, and Winchester, VA. MPC was founded in 1965 in Rhode Island, and has continuously operated since that time. Building on over 50 years of experience, MPC partners with customers to develop innovative solutions to the toughest manufacturing challenges.

The Opportunity:

MPC is seeking an enthusiastic and self-motivated Maintenance Technician to join our team. The Maintenance Technician will be responsible for working with the Plant Engineering Manager on the day to day operational duties necessary to ensure a clean, safe and productive manufacturing environment.

Essential Duties and Responsibilities:

- Make routine daily rounds to check the operational readiness of building systems including heating, cooling, ventilation, vacuum systems, nitrogen systems, compressed air systems and lighting.
- Make routine daily rounds to confer with supervisors and machine operators to determine operational condition of the equipment in use.
- Report all issues and observations to the Plant Engineering Manager to determine course of action.
- Recognize and remedy or repair small mechanical or electrical problems as needed, reporting more complex situations to the Plan Engineering Manager for course of action
- Perform routine and special duties including cleaning, service, repairs, modifications and improvements to equipment and systems.
- Perform preventive maintenance as scheduled and enter all task related data in the preventive maintenance software program.
- Maintain the cleanliness and order of the maintenance workshop, associated tools and equipment.
- Maintain the cleanliness and order of all maintenance related spaces, including the boiler, compressor and electrical rooms.
- Maintain a forklift license and operate the forklift as needed to perform maintenance related work.

- Refer to machine operation manuals and technical data to properly understand, maintain, service and diagnose equipment.
- Responsible as part of a small team for snow and ice removal at all entrances as required.
- Any other assigned duties as needed.

QUALIFICATIONS

- Two years vocational or technical training
- High school diploma
- Strong mechanical aptitude
- Punctuality, good work habits and the ability to work with others
- Valid driver's license
